

A division of:

Greetings!

Parker Majestic is proud to offer a multi-level maintenance program to restore your Parker surface grinders. This *economical approach* to providing your operators with the best machine possible will allow them to continue to produce parts at the tolerance levels required.

Before

We offer flexible options for getting your surface grinders restored:

In your shop:

- We can visit your location and inspect your machines to provide you with itemized costs of what needs refurbished, or
- We can come to your site prepared to perform as many of the needed repairs as possible.

At Parker Majestic:

- We can perform a customized rebuild of your machine giving you the opportunity to determine which items you would like repaired, or
- We can do a complete remanufacture of your machine, restoring it to original OEM specifications.

After

We understand the need for you to control your costs. We are offering flexible solutions to help you come up with the *most economical solution* to suit your specific needs.

Call us today to discuss the options that Parker Majestic has to offer and to be on t your way to having your old machines running like new.
